Midwest Jobbers prefinished Exterior millwork is available in 10 standard colors.

Since wood is a natural product, certain variations in color or finish quality may occur.

MAINTENANCE - All exterior finishes are affected by exposure to the sun, weathering, moisture and air pollutants. A simple application of a maintenance coat of topcoat will renew the protection of the stained surface. Re-apply the topcoat every 3-5 years, or when the gloss fades. Check that the expiration date on the can has not elapsed before reapplying the topcoat.
